

**ERK  
PROJE**

## ABOUT US

Our company, which was established in 2005 for the purpose of superior quality design of special projects, has been providing worldwide solutions focusing on technical knowledge, customer needs and developing technology as a comprehensive engineering design company with projecting, consultancy and supervision services on electrical installations for more than 18 years.

What makes us qualified is our ability to produce solutions and organize according to the needs of our customers, with our experience, understanding of responsibility, approach to details, within the framework of national and international specifications, in accordance with the applicable laws, by prioritizing customer satisfaction and needs.

As Erk Project, we would like to thank our colleagues and our valued customers who have walked with us in completing many successful projects together with reputable architects, engineering groups and contractors in the sector.

Glbin Kk

*« A customer-focused  
approach built on trust is  
the basis of our success. »*

## OUR SUCCESS

18+ YEARS

700+ PROJECT

15+ COUNTRY

TOTAL: 8.069.000+ m<sup>2</sup>

<b>HEALTH BUILDINGS</b>	<b>1.820.000+ m<sup>2</sup></b>
<b>RESIDENCE</b>	<b>1.874.000+ m<sup>2</sup></b>
<b>SHOPPING MALL &amp; TRADE CENTER</b>	<b>1.250.000+ m<sup>2</sup></b>
<b>AIRPORT</b>	<b>92.400+ m<sup>2</sup></b>
<b>MULTI-USE PROJECT</b>	<b>552.000+ m<sup>2</sup></b>
<b>DATA CENTER</b>	<b>64.500+ m<sup>2</sup></b>
<b>INDUSTRIAL FACILITIES</b>	<b>835.800+ m<sup>2</sup></b>
<b>EDUCATIONAL BUILDINGS</b>	<b>258.000+ m<sup>2</sup></b>

## PROJECT DESIGN

**Nowadays, buildings are developing rapidly in line with technology.**

**Electrical system design is no longer as simple as lighting and power design placed on an architectural plan.**

**Our engineers are aware that the electrical system is one of the important components that revitalize the building and that although the projects have the same basic qualities, there are characteristic features that distinguish a project from others.**

**We approach and solve the project with the awareness that a good understanding of the features of the project is the basis for achieving the purpose and target of the project.**

**We work to offer feasible, operable and livable projects for our customers by meticulously analyzing the requirements of life safety and compliance with norms in order to offer a design that supports the life of the building.**

## CONSULTANCY & PROJECT MANAGEMENT

**ERK Project and Engineering as a technical or scientific solution to solve a problem on the natural or built environment, scientific facts, based on technology, based on information and ideas with the concept of technical advice and consulting services we offer.**

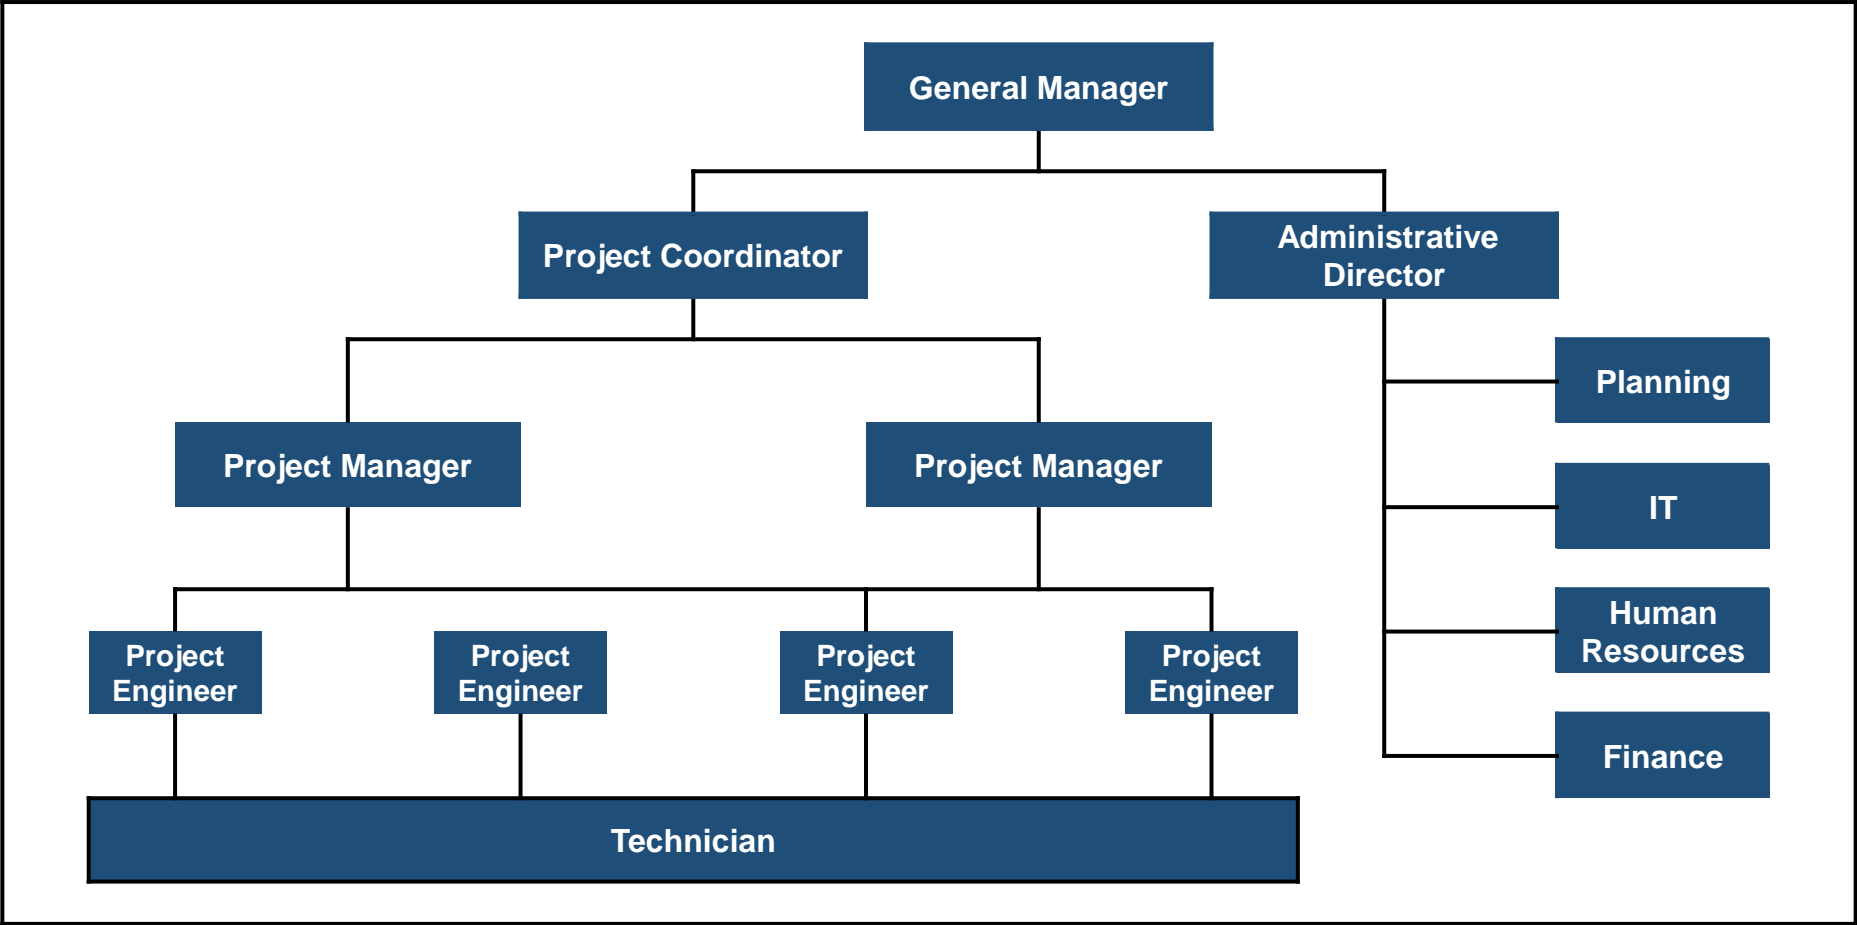

**Design is the basis of a project, but it needs to be coordinated with other disciplines at the same time as it is within the time planning and budget for the implementation of the project.**

**Our engineers work with responsibility by taking active role in design and project supervision, site coordination, measurement, testing and commissioning with their knowledge and experiences.**

**Taking responsibility for the projects we are consulted and evaluating risks as our own risks, we work to provide realistic, applicable and manageable solutions to our customers.**

## ORGANIZATION CHART

## TEAM

Our company is structured to achieve success with technical staff who have technical knowledge and business management skills.

We work in full coordination, knowing that each of us are players of a team, open to continuous learning and experience.

Strong coordination and team spirit enable us to easily adapt to the size or complexity of projects.

We are happy and proud to achieve success together with our team.

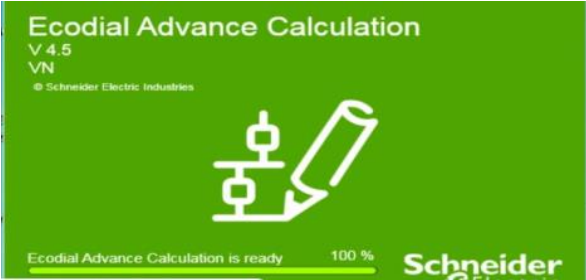

Team;

Management .....	2
Electrical Engineer .....	8
Technician .....	1
Staff .....	1

## SOFTWARE

- Projects
- Lighting Calculations
- Short-Circuit Calculation
- Short-Circuit Calculation
- Documentation

ACAD, REVIT  
Dialux, Relux  
Simaris, Ecodial, DOC ( EN Standardında )  
Amtech ( BS Standardında )  
Microsoft Office

## OUR PRINCIPLES & CULTURE

Our basic principle is to comply with laws and regulations and adhere to engineering principles. Our company culture is based on ensuring sustainability by adhering to basic principles. We continue with our belief that sustainability will be achieved through teamwork, giving importance to individual development and ideas. We continue to maintain our place in the sector by adhering to our principles, the company culture we have created, and our approach targeting employee and customer satisfaction.

### PRINCIPLES

- **Compliance with laws and regulations**
- **Commitment to the principles of ethical behavior**
- **Commitment to engineering principles**
- **Being committed to information security**

### CULTURE

- **Continuity**
- **Openness, Transparency**
- **Employee and Customer Satisfaction**
- **Knowledge sharing**
